

# Decision Reports as a Service

---

Significant provide **fully managed** and **tailored** decision report generation as a service.

## Terminologies

Terminology	Description
Fully Managed	Significant takes care of the digital printer operations.
Tailored	Significant captures the essence of the decision in question into a DF template. However, customer's domain experts are a prerequisite. And customer's IT specialist are a prerequisite to capture the system integrations.
Decision Reports as a Service	Once the assessment object(s) are registered by the end user (customer's customer), and decision maker has assessed the assessment object, a PDF file is generated and automatically archived (delivered) to customer's systems of records.

## Decision report

A decision report is comprised of the following parts:

Part	Description
Assessment Object	The object which the assessment is perform upon
DF Template	Domain customization / the essence of the decision is captured during onboarding of a customer as a DF template.
Judgement	Decision maker performs the judgement by filling the evaluation form, which is generated dynamically, based on the registered AO and captured DF template
Decision Report	Assessment Object + DF Template + Judgement => Decision Report - A human readable system agnostic report documenting a decision (PDF file)

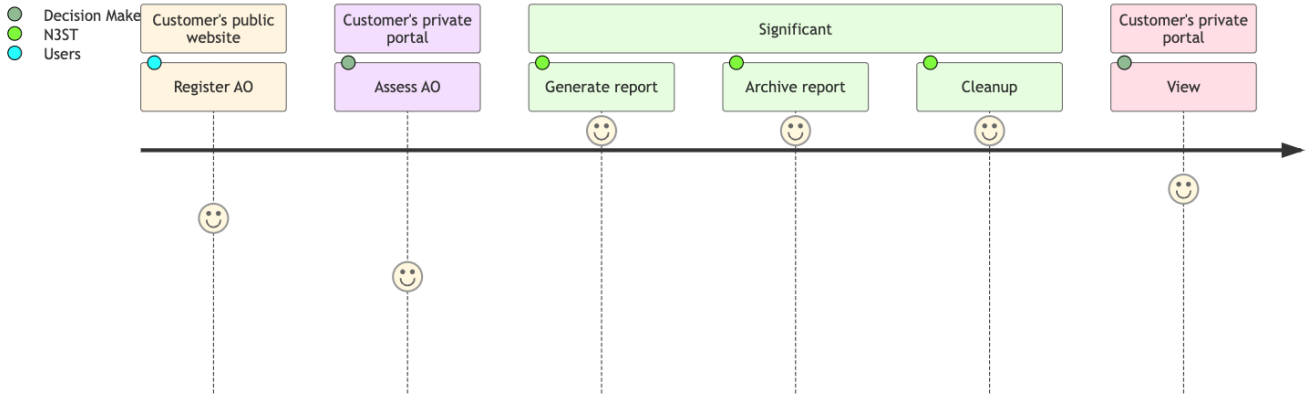

## Processing

The process/flow of a decision report generation comprised of the following steps:

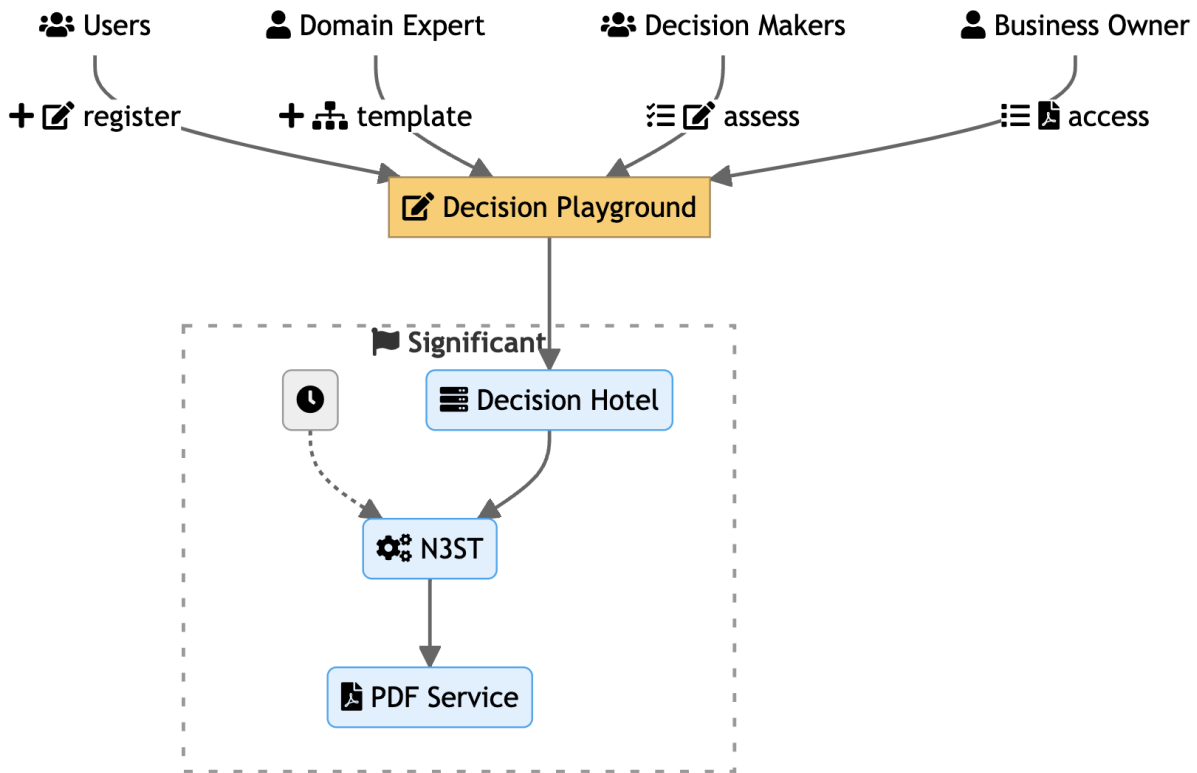

Step	Description
Register	An assessment object (AO) is registered by customer's customer on customer's public website. Decision Playground to be installed as a widget on customer's public website. Checkout Decision Playground mode Register on significant.no
Assess	Decision maker performs the judgement by filling the evaluation form. Decision Playground to be installed as a widget on customer's private website. Checkout Decision Playground mode Assess on significant.no

Step	Description
Generate	N3ST generates the decision report
Archive	N3ST archives the generated report securely back into the customer's system of records.
Cleanup	N3ST cleans all intermediate data, except some metadata, such as AO id and DF template id, which is later used for invoicing/reporting.

### Assessment Object (AO) journey

### Assessment Object (AO) journey

**Tools** No integration required from customer system to N3ST.

WhoAml API

# WhoAmI 1.0 OAS 3.0

Provide mandate to Decision Playground. Decision Playground assumes presence of an active browser session (User to be logged in).

[Contact the developer](#)

[Find out more about Decision Playground](#)

Servers

https://acme.corp/v1

Authorize

**mandate** Host to provide mandate to Decision Playground.

GET /whoami Retrieve current user and hotel info

GET /token Generate Bearer token for current user to invoke Decision Hotel

**Mandate** - Decision Playground to get it's mandate from it's host

When Decision Playground is loaded, it invokes a whoami api at host to initialise its context:

```
endpoint: window.location.host + '/whoami'
```

```
200 response: {
  role: "R2",
  hotel: "https://hotel.dev.n3st.art"
}
```

xxx/no response.

Decision Playground default mode (Anonymous):

```
{
  role: "R5",
  hotel: undefined
}
```

## SLAs

SLA	Description	Unit	Level	Comment
throughput	Minimum throughput per hour	number	100	Garantee production and delivery of 2 300 reports per day

# throughput projections  
2 300\*30 = 69 000 per months  
2 300\*30\*12 = 828 000 per year

## Confidentiality, Integrity & Availability of customer data

Quality	Description	N3ST
Confidentiality	NO unauthorized data access	IAP (MFA), RBAC, Multi-tenancy, data encryption at transit (TLS), case content / business data encryption at REST, auto rotations of encryption key
Integrity	NO unauthorized modifications, deletion and creation.	Encryption in transit (https). Case data at rest encryption. Strong access control. Case history (case event logs). Audit logs. No case content log. <b>Cleanup of intermediate storage right after delivery.</b>
Availability	To be available for authorized users at all time	Processing time is to be agreed with customer
